

Craig Pesme

PHD CANDIDATE IN ECONOMICS · PARIS SCHOOL OF ECONOMICS

craig.pesme@psemail.eu | craigpesme.github.io

Research interests

Welfare economics; measurement of well-being, inequality and real income; consumer behavior and preferences; climate transition and living standards.

Education

Paris School of Economics – École Normale Supérieure – PSL

PhD in Economics

Paris, France

2022 – Expected Sept. 2026

- Dissertation: *Preferences and living standards in a greening economy: theory and measurement*
- Supervisor: Marc Fleurbaey

Paris School of Economics – École Normale Supérieure – PSL

MSc in Economic Analysis and Policy (APE)

Paris, France

2021 – 2022

- Graduated with Highest Honours

Mines Paris – PSL

Master of Science in Engineering (Civil Engineering)

Paris, France

2017 – 2021

Lycée Sainte-Geneviève

Preparatory Classes for the Grandes Écoles (MPSI/MP*)

Versailles, France

2015 – 2017

Research output

Costs and Co-Benefits of Climate Transition Policies: How Accurately Will They Be Measured by Standard of Living and Well-Being Indicators?

with Didier Blanchet. *Economie et Statistique / Economics and Statistics*, 543, 3–20, 2024.

Published shorter version of *Will Standard-of-Living Indicators Capture the Welfare Effects of Climate Transition Policies?*. DOI: 10.24187/ecostat.2024.543.2116.

Will Standard-of-Living Indicators Capture the Welfare Effects of Climate Transition Policies?

with Didier Blanchet. Working paper.

Studies whether standard income and price indicators capture welfare effects from green creative destruction, carbon taxation and quantitative regulation.

Inequality Aversion and the Measurement of Real Income

Working paper.

Develops an axiomatic approach to real-income measurement under non-homothetic preferences and finite inequality aversion.

Fair Interpersonal Comparisons: Characterizing Contour-Set Volume Measures of Well-Being

Working paper.

Characterizes contour-set volume measures for comparing well-being across individuals with heterogeneous preferences.

Estimating the Impact of Changing Preferences on the Costs of the Green Transition

with Rafael Schutz. In progress.

Quantifies how changing preferences may alter the experienced cost of the green transition.

Measuring and Representing the Distribution of Growth

with Marc Fleurbaey. In progress.

Develops distribution-sensitive representations of growth for welfare and national-accounts applications.

Research stay

King's Business School – King's College London

Economic Statistics Center of Excellence

London, UK

Sept. 2024 – Dec. 2024

Teaching

Université Paris 1 Panthéon-Sorbonne Teaching Assistant, <i>Introduction to Econometrics</i> • Tutorials and problem sets for third-year undergraduate students	<i>Paris, France</i> 2024
Lycée Montaigne Mathematics Tutor (<i>Colleur</i> in Preparatory Classes)	<i>Paris, France</i> 2021 – 2023
Mines Paris – PSL Teaching Assistant, <i>Complex Analysis</i>	<i>Paris, France</i> 2020

Professional experience

French Treasury – Ministry of Economy and Finance Intern, Transport and Energy Unit (POLSEC 3) • Quantified the socio-economic impacts of hydrogen mobility scenarios for France.	<i>Paris, France</i> 2021
CERNA, Mines Paris – PSL Research Assistant • Conducted econometric analysis of the Energy Savings Certificates (CEE) scheme's impact on actual energy savings.	<i>Paris, France</i> 2020
HelloFresh Data Science Intern • Developed predictive algorithms for customer behavior.	<i>Sydney, Australia</i> 2019 – 2020

Skills

Programming Languages	Python, R, Java French (native), English (native), Spanish (B2)
